Daniel Skatov
Chief Science Officer

2026

A handwritten signature in black ink, appearing to read 'Najmaddin Mustafa'.

Najmaddin Mustafa
IT-Project Manager

APPLIED TECH INTERNSHIP

This diploma is proudly presented in recognition of the successful completion of a 10-week internship at Nation.dev.

Throughout the internship, you demonstrated professionalism, curiosity, adaptability, and a strong commitment to learning while making a valuable contribution to the team.

You gained practical experience in Amazon Web Services (AWS), using AWS CloudFormation to automate infrastructure, build and manage cloud environments, configure Virtual Private Clouds (VPCs), implement firewall rules, apply network security best practices, and support CI/CD pipelines for automated build, testing, and deployment.

You also completed practical assignments using artificial intelligence (AI) to develop platforms and technical solutions, worked in live remote server environments by creating server replicas and restoring backups, strengthened your troubleshooting skills by resolving system issues and error codes, and performed quality assurance testing by identifying, documenting, and reporting software defects to improve platform quality and reliability.

Your dedication and technical growth have been greatly appreciated. We are confident the knowledge and practical experience gained during your internship will provide a strong foundation for your future career in information technology.

We thank you for your contribution to Nation.dev and wish you continued success in your professional journey.
